

Now's the time to upgrade

To achieve the best pricing on automation mailings mailers must meet Full-Service requirements.

Full-Service pricing is available for the following classes of mail; Standard Mail® letters and flats, Periodicals®, Bound Printed Matter® flats, and First-Class Mail® postcards, letters and flats.

With the Full-Service Intelligent Mail® Barcode you'll get:

- Additional discounts on your automation mailing
- The opportunity to eliminate permit fees
- Free Address correction
- Visibility into your mailings
- Opportunity to use the same permit at any location via our Mail Anywhere program

We encourage you to contact your Mail Service Provider (MSP) or software vendor to upgrade your level of service.

Vendor Full-Service Software Capabilities

Vendors offer a variety of software products to prepare and present presort mailings which support Full-Service. The vendors listed on the reverse side of this sheet have successfully certified their Full-Service software products with the Postal Service™. The list shows the name of the vendor and software package and telephone number. We identify if the software is Cloud based or On Premise, the method of submission to the Postal Service and the class of mail the software supports.

If you or your MSP use one of these products, please contact the software vendor to activate the Full-Service capability.

The list of vendors is updated as new products are certified. Please check the RIBBS website to ensure that you have the most current list of vendors who have tested their Full-Service software with us.

Cloud Based or On Premise Software

- **Cloud Based:** Software that provides a Full-Service solution in the cloud and does not require the customer to download software. The solutions identified within this document are generally designed for medium to small business customers.
- **On Premise:** Software that provides a Full-Service solution that is installed and runs on computers within a customer's facility. The solutions identified within this document are generally designed for medium to large business customers.

If you are interested in one of these products the vendors telephone number has been provided. For those accessing this document online each vendor name is also a link to that vendor's webpage where you can find additional information.

Submission Types

In order to qualify for the Full-Service discount mailers are required to electronically submit their mailings to the Postal Service using one of the 3 methods below:

- **Postal Wizard:** Postal Wizard is a tool that provides mailers a secure way to submit a postage statement online. Software that supports this submission method allow mailers to presort mail and generate unique barcodes. The software also generates a postage statement.

To complete the Full-Service transaction, mailers must enter Postage Statement information online via the USPS Postal Wizard tool where they annotate the range of Intelligent Mail® barcodes used in a mailing.

Option A: These barcodes could be unique for mail pieces across mailings

Option B: Unique barcodes for each mail piece in a mailing

- **Mail.dat:** Mail.dat is the industry standard for presort data. Mail.dat files contain detailed information about a mailing. Software that supports this submission method allows mailers to presort mail and generate unique barcodes. The software also generates a Mail.dat file. To complete the Full-Service transaction mailers must submit the Mail.dat file to the Postal Service via the USPS Business Customer Gateway.
- **Mail.XML:** Mail.XML is an XML based specification for sending the Postal Service detailed information about a mailing. . Software that supports this submission method allows mailers to presort mail and generate unique barcodes. The software also generates a Mail. XML file. To complete the Full-Service transaction mailers must submit the Mail.XML file to the Postal Service via the USPS Business Customer Gateway.

For more information on the software capabilities that support Full-Service, please see the vendor matrix on the following page.
